

CORRIGENDUM TO SWFL/0/21

1. At paragraph 12 of SWFL/0/21 it is stated that the Black Law wind farm consists of 62 turbines. This statement was based on the Scottish Executive letter of consent for the Black Law development, which gave approval for up to 62 turbines, and on the UK Aeronautical Information Publication (AIP), at ENR 5.4.1, which lists the locations of 62 turbines.
2. It has subsequently emerged that the AIP is in error and that the number of operational turbines at the Black Law site is (and was on 7th March 2008, the date of the radar recording) 54. The remaining eight turbines are to be constructed under a Phase 3 development of the site which is currently in the planning process.
3. At 54 turbines, Black Law has one turbine less than the combined total of Steadings (21), Green Rigg (18) and the now-reduced Ray (16) proposals.
