

## Notes

1. Anything outside the LAND boundary and potentially outside D510 are referred to as OFF base. Within the LAND boundary marked on most maps, we refer to sites as ON base. On base sites include Berry Hill R8 etc
2. 223 = ZSU STRAIGHT FLUSH; 234 = radar controlled gun system;  
208 = SA-8 LAND ROLL; 206 = SA-6  
A = Emulator - bepoke copy of original; R = Real radars - numbers as above; P = Simulators - Numbers are as for A.
3. Digits in the table mean days that those emitters occupied the sites indicated. Daily activity/use would be impossible to quantify for individual radars.
4. Years 2006/2007 are indeed Jan-Dec.
5. If the cell is blank then the emitter did not deploy to that site.
6. OTA OP 11 = Otterburn Training Area Observation Post No 11.
7. If the Range is active then sites at Berry Hill will have active emitters on site.
